Copilot for Security: Readiness Assessment

Ensure your organisation has the correct controls and boundaries in place to securely deploy Microsoft Copilot for Security. This engagement ensures that there are no existing vulnerabilities in your environments that could be exploited through deploying Copilot.

Common Challenges

Fragmented Security Tools

Utilising a large number of security tools brings unnecessary complexity and cost to your security operations.

Lack of Expertise

As a cutting-edge technology, few organisations have the expertise to properly deploy and utilise Copilot for Security.

Plans for Adoption

Without a deep understanding of Copilot for Security, it is challenging to plan a deployment that minimises the required time and resources.

How Bridewell Can Help

Implement Key Controls

Our consultants will ensure you have appropriate policies in place for Identity Access Management (IAM), document classification, and data loss prevention.

Adoption Framework and Implementation

We will provide a clear process for implementing Copilot for Security and take the lead on rolling it out within your security operations.

Cost Benefit Analysis

Our consultants will provide a comprehensive review of the potential benefits of utilising Copilot for Security, considering your existing processes and technologies.

Increase Return on Investment

Utilise Copilot for Security to enhance your security capabilities without incurring significant cost.

Schedule a Consultation With Our Team

Speak with our team for more insight on how you can leverage Copilot for Security.

Copilot for Security: Readiness Assessment

1 Initial Landscape Analysis
Assessment of current security landscape and tooling, to understand the baseline from which Copilot for Security will operate.

2 Objective Definition
Define your target maturity level and other security objectives.

3 Regulatory and Compliance Review
Understand whether there any regulatory or legal barriers to deploying Copilot for Security.

4 System Integration Review
Complete a holisitic review of what Copilot for Security will integrate into within your organisation.

5 Prompt Engineering Readiness
Understand your internal capabilities to craft effective prompts.

6 Technical Readiness
Understand your internal capabilities to technically support and maximise Copilot.

7 Training Plan
Deliver a training plan for your employees that will guide them in utilising Copilot for Security effectively.

8 Report and Adoption Roadmap
Adoption roadmap for Copilot for Security that establishes milestones for deploying various features.

About Bridewell

Bridewell specialises in protecting and transforming organisations operating in Critical National Infrastructure (CNI), as well as those who want the highest standard of security. Our team are highly accredited by major industry bodies and have extensive experience delivering cyber consulting and managed security services across multiple sectors. As a long-standing Microsoft partner, our team are also experts in maximising the effectiveness of Microsoft Security solutions.

We have a deep understanding of the challenges faced by CNI organisations and work in continuous partnership with our clients to find the right solutions to defend them from threats and attacks.
